The Problem

The gate closes. The support ends. The habits fade.

Two people lose when the gate closes: the guest, and the retreat that just transformed them.

No bridge home

Leave Gwinganna and there is no path back to real life. Day-to-day support stops at the gate.

Connections lost

The gang you bonded with scatters.
The leader you trusted is gone.
Accountability evaporates.

Habits don't stick

Motivation fades within days. Old patterns return until the next retreat if there is one.

The retreat loses too. **The relationship ends**, the guest drifts, and the next booking goes uncaptured.
The business that delivered the breakthrough gets none of the credit.

“The work is not done on retreat. It is done when you get home. Right now, no one owns that journey home.

The \$1 trillion is what guests spend.
Our **customer is the business** that serves them.

\$1T+

global wellness tourism crossed
US\$1 trillion in 2024

~8.9% CAGR — projected to roughly double by 2033

200k+

spas & wellness facilities
worldwide, up 15% since 2019.
Every one of them needs retention.

The spend is on the week away

Guests pay thousands for the retreat. Almost nothing exists for the 51 weeks that follow.

Retreats want retention

Repeat visits are the prize. A bridge product deepens loyalty and lifts re-bookings.

No clear category winner

WhatsApp groups and generic fitness apps fill the void. None own 'post-retreat'.

The Concept

BEYOND turns a one-week high into a year-long habit.

A subscription that keeps the leader you trust, the people you bonded with and the practices you started, and rebuilds them into daily life.
